

[Special Instructions for IE 8](#)

Microsoft Internet Explorer version 8 can cause some of the SpellDoctor Teacher Screens to not display properly. To solve this problem, follow these steps:

1. Open Internet Explorer and log into the SpellDoctor Teacher Status Window.
2. Locate the **Page** menu at the upper right of the screen.
3. From this menu select **Compatibility View Settings**.
4. In the new window, click **Add**. Then click **Close**.
5. Your Teacher Screens should now display properly.

Note: Once Compatibility View is activated, it becomes the default setting for SpellDoctor until turned off.
